

SCBI for EO - 12 hour PH reaction

Quickly monitoring with SCBI

The development towards quicker read-outs of SCBI is still ongoing , most of the solutions require a Quick Read-out Incubator which is expensive to acquire. The new Sterintech SCBI EO is giving a PH reaction with a normal dry bed incubator in 12 hours time only. An improvement compared to our previous model which was needing 48 hours of incubation.

SCBI for EO, pop. 1x10E6

Dual Incubator for SCBI

Unit: 100 pieces

Unit: 001 piece

Characteristics:

- ◆ Biological Indicator conform to ISO 11138 and ISO 11138-2
- ◆ SCBI EO: Bacillus Atrophaeus ATCC 7953
- ◆ Population: 1x10E6 spores per vial
- ◆ Color change: Orange to bright Yellow
