

UltraSon - Efficiency Test

Pre-Cleaning

Is your ultrasonic energy level ok

The Ultrasonic baths in use at the Pre-cleaning side of the CSSD, needs to be tested on a regular basis. The UltraSon - Ultrasonic Bath Efficiency Test can be used for validation purposes as well as routine process testing. Once placed in the Ultrasonic bath (in accordance with the IFU) the color of the UltraSon Test is shifting from blue into yellow if the energy levels of the Ultrasonic bath are ok. At high levels of energy the UltraSon can even color into a white color fluid.

906.005.0025 - UltraSon - Ultrasonic Bath Efficiency Test - 25 vials per unit

Characteristics:\

- ◆ Easy to use - Easy to interpret
- ◆ Can be used for validation purposes
- ◆ Can be used for routine process testing
- ◆ Non-Toxic
